Air purifier that completely filters the air in a 40m² room every 12 minutes.

Style **PARTICLE FILTER**, SMOKESTOP FILTER

PRODUCT DETAILS

Medium-sized rooms
Filters room air at the industry-recommended rate of 5x an hour (or about every 12 minutes) in a 40 m² room to effectively lower particle levels and maintain a comfortable environment in bedrooms, living rooms, and home offices.

Automatically adjusts to changing conditions
Integrated sensors auto-adjust to current conditions in your environment to ensure air quality remains at a healthy level.

Odor, allergen & germ removal
Available with an advanced SmokeStop™ or particle filter for filtering airborne bacteria, viruses, and allergens like pollen, dust, and mold, as well as gaseous pollutants like chemicals and odors from pets, cooking, and smoking.

Powerful filtration
Blueairs unique combination of electrostatic and mechanical filtration that Blueair calls HEPASilent™ filtration technology sets us apart. The combination allows us to use filters that are less dense and require less air pressure than traditional HEPA filters without a loss in performance— resulting in quieter and more energy efficient air purifiers.

4x faster gas and odor removal
SmokeStop™ filters use natural coconut carbon to effectively filter out airborne gaseous pollutants like smoke, volatile organic compounds (VOCs), exhaust, smog, odors, and chemicals.

Built to last

Housing made from durable, galvanized steel stands the test of time.

Sleep without disruption
Whisper quiet on the lowest speed (32 dB) and equivalent to the noise level of rainfall on the highest setting (52 dB).

Low energy consumption
Energy efficient (15-90 W) - so you can run this air purifier 24/7, knowing it uses less energy than a traditional lightbulb.

Hidden control panel
Manually check Wi-Fi and filter status and adjust speed setting at any time from the control panel located under the flip-top lid.

For more specifications, see the datasheet in the downloads tab.
