PRODUCT DETAILS

Enjoy the advantages of DAB+ digital radio even when you're on the go! The DIGITRADIO Car 2 DAB+ auto adapter makes this possible - without having to carry out complicated and expensive replacement of your existing car radio system. This provides you with not only digital radio quality, but also many other functions which older car radios simply don't have. Once connected to your mobile phone, you can stream your favourite music via Bluetooth and listen to it via the existing sound system in the car. You can also answer calls with a clear conscience, since the DIGITRADIO Car 2 is perfectly suitable as a hands-free system. You can even communicate with the digital voice-activated assistant on your smartphone without having to hold your mobile device while doing so. This means that the DIGITRADIO Car 2 ensures not only the best in digital entertainment, but also a safe journey.

In order to guarantee road safety, all functions are controlled using an elegant wireless controller which, being battery-operated, can be attached to virtually any part of the car without any annoying cabling. The large, illuminated buttons enable easy and intuitive operation, which you will already be familiar with from all TechniSat digital radios. This means that, with the DIGITRADIO Car 2, you will reach your destination in relaxation and safety, even when going on longer journeys.
