PRODUCT DETAILS

**Sound for professionals**
Beats consulted with real athletes to design wireless headphones that can handle the toughest workouts - and they've said time and time again that sound is a top priority. Powerbeats Pro deliver powerful, balanced sound, thanks to a completely redesigned sound package with perfect sound reproduction, maximum clarity and improved dynamic range. Great sound starts with a perfect fit. That's why ergonomic design was a priority to give you the best possible sound experience.

**Play on both sides or just one**
Left, right, both sides - enjoy perfect control over your playback. Both earphones offer full volume and track control, so you don't need your iPhone or any other device to control your music. Auto play/pause sensors detect if you're wearing the earphones. So it starts as soon as you're ready. And with voice assistant for a range of compatible devices, you never have to interrupt your workout.

**Power supply. Play.**
Hours of training? Marathons? Let's go! Each earphone provides up to 9 hours of music enjoyment. Together with the charging case, you get more than 24 hours of playback. And if you need a little more, 5 minutes of charging with Fast Fuel gives you 1.5 hours of playback when the battery is low.1 Plus, the earphones save even more battery: sensors detect when the earphones are not in use and

automatically put them to sleep. When you want to use them again, just pop them in your ears and you're good to go. Now you can just exercise instead of worrying about your batteries.

**Just ask Siri.**
Talking to your personal assistant is easier than ever. Just say "Hey Siri" when you need help. You don't have to pick up your iPhone to do it. With the Apple H1 chip, Powerbeats Pro have a faster, more stable wireless connection to your devices.

**Wireless solution that works**
The Powerbeats Pro are ready when you are. With Bluetooth Class 1, these wireless headphones offer extended range and fewer interruptions. So you stay connected, even when you're on the move. Each earbud connects individually to your device for a better connection and more freedom when listening to music and making calls. An accelerometer with voice recognition and multiple microphones detect your voice and reduce outside noise. They're ready to use right out of the box. Just open the case, hold them near your iPhone - they'll also automatically connect to your Apple Watch, iPad and Mac.
