Modern DAB+/FM kitchen undercounter radio

Colour

PRODUCT DETAILS

If you like to listen to the radio at home and have little or no space for a receiver, the DIGITRADIO 21 is the perfect choice. The compact digital radio can be installed in a space-saving way, e.g. under kitchen cabinets or shelves, and the installation material is already included in the scope of delivery. The large colour display and the controls are placed on the front, which is slightly slanted towards the bottom. This means that you can still see all the information on the display and have the functions of the radio under control even if you mount the DIGITRADIO 21 a little higher up on the shelf. Once mounted, you can enjoy the digital radio programme variety via DAB+ with many nationally and regionally receivable stations.

DAB

DAB+ digital radio is noise-free radio with extremely robust reception. DAB+ contrasts the regionally limited FM programme offering with many radio programmes broadcast nationwide in the best digital quality. In addition, there are numerous regionally broadcast stations.

FM/ RDS

Receive classic FM radio stations in your reception area. Via RDS (Radio Data System) you also receive extended programme information and alternative additional frequencies to the FM radio station you are listening to.

Watch

In addition to channel and other programme information, you can also display the time on the integrated display. The clock information is transmitted electronically with the programmes received, so the correct time is set automatically.

Alarm clock / sleep timer

This unit has practical sleep timers with numerous adjustable switching times. This allows you to wind down comfortably in the evening without having to worry about switching it off. Via the integrated radio alarm function, you can be woken up by your favourite programme if you wish.

Bluetooth streaming

Bluetooth audio streaming lets you transfer music from your smartphone, tablet or PC to the unit without a wired connection and in the best quality.
