SRP 79,00 €

**79,00 €**

DAB+/FM radio adapter with Bluetooth, perfect as a complement to your stereo system or AV-receiver.

Colour

### PRODUCT DETAILS

Many older music systems sound good, but do not offer modern radio reception or music streaming. The DIGITRADIO 10 from TechniSat is a radio adapter made in Germany and the perfect upgrade for the beloved hi-fi system or an AV receiver. The compact receiver extends the sound system by receiving crystal clear DAB + digital radio or radio via FM if your stereo system does not yet have a radio tuner. For both radio tuners (DAB + and FM) there are 20 memory slots available for favorites.

Time, date or station as well as title names are shown on the large, very easy to read and very sharp OLED display. The DIGITRADIO 10 is controlled with the included remote control. The DIGITRADIO 10 also receives wireless digital audio streams from mobile devices via Bluetooth. So you can listen to your favorite music, streaming services or the new audio book comfortably on the large speakers of the stereo system.

### What's in the box

- DIGITRADIO 10
- DAB/FM wire antenna
- Audio connection cable
- Power supply
- Remote control
- Manual

### Specs

**Product Attributes**
