### PRODUCT DETAILS

#### Music (almost) straight from the socket

There is not room for a radio everywhere, where there would also be an ideal place to listen to the radio - such as in the bathroom: Often there is no space for a radio here, but especially if you lie comfortably in the bathtub, a little musical company would be quite nice for the ambience. The DR40BT plug-in is simply plugged into a free socket and you can enjoy your favorite stations or stream music to the radio speaker. So you do not have to worry about the power cord lying around and save yourself the time-consuming installation of a flush-mounted radio.

#### Digital and analog radio reception

Who does not know the eternal search for the perfect, noise-free FM frequency? With digital reception, this search is now over: DAB + offers 1A sound without any interference. A large number of regional and nation-wide DAB stations can be received at the push of a button. Is your favorite local channel not digital yet? Thanks to FM mode, you don't have to do without it.

#### Stream wirelessly via Bluetooth

The selection of radio stations is huge, but nothing beats the specially created playlist. Thanks to Bluetooth, you can stream these quickly and easily from your smartphone, tablet, notebook or PC to the radio. Simply pair the radio and device and enjoy your favorite music.

#### Connect external music sources via AUX

Via the AUX-IN socket on the device, your favorite pieces of music can be quickly and easily transferred directly from your mobile phone, tablet or PC to the radio using the audio cable.

**Sleep timer and alarm function**

With the sleep function, you can allow yourself to be accompanied by your own music. The radio switches itself off after the preset time. The digital radio accompanies you throughout the day when you get up and you can choose to be woken up by radio music or by the buzzer. You can save two alarm times: For example, one for your working days and one for the weekend.

**Control directly on the device**

For everyone who values uncomplicated music enjoyment: The radio can be operated directly on the device using the control dial. 30 favorite memory slots each for FM and DAB stations offer enough space for your favorite radio stations - 2 of them can be selected directly using the favorite buttons on the device for even faster access.

**What's in the Box**

- 1 "DR40BT-PlugIn" digital radio
- 1 dipole antenna
- 1 audio cable 3.5 mm - 3.5 mm
- 1 quick-start guide (multilingual)
