PRODUCT DETAILS

Where once favourite music and radio plays were played from cassettes and mix tapes, today CDs, music streams or digital radio stations thrill. The DIGITRADIO 1990 can be taken anywhere quickly and easily with its carrying handle - even when travelling thanks to optional battery operation. And whatever you or your kids like to listen to sounds really good through the built-in stereo speakers.

The unit plays CDs via the CD-MP3 player as well as music files from data carriers connected via USB and can even charge mobile devices via the USB port.

Radio is also a lot of fun with the DIGITRADIO 1990. Here you can receive available programmes via FM or digitally via DAB+ digital radio. You can also connect another audio source, such as an MP3 player, via the AUX-IN input. The option of streaming music wirelessly to the DIGITRADIO 1990 via Bluetooth is particularly convenient. For example, select a playlist or a radio play on the smartphone to play it for the little ones while playing or falling asleep on the DIGITRADIO 1990.

DAB

DAB+ digital radio is noise-free radio with extremely robust reception. DAB+ contrasts the regionally limited FM programme offering with many radio programmes broadcast nationwide in the best digital quality. In addition, there are numerous regionally broadcast stations.

FM/ RDS

Receive classic FM radio stations in your reception area. Via RDS (Radio Data System) you also receive extended programme information and alternative additional frequencies to the FM radio station you are listening to.

Watch

In addition to channel and other programme information, you can also display the time on the integrated display. The clock information is transmitted electronically with the programmes received, so the correct time is set automatically.

Alarm clock / sleep timer

This unit has practical sleep timers with numerous adjustable switching times. This allows you to wind down comfortably in the evening without having to worry about switching it off. Via the integrated radio alarm function, you can be woken up by your favourite programme if you wish.

CD player with MP3 function

You can listen to your entire CD collection on the integrated CD player. The CD player supports classic audio CDs as well as CD-R and CD-RW formats. In addition, you can also play MP3 CDs.

Equalizer

Manually control and adjust treble and bass to achieve an individual and optimal sound mix.

USB charging

You can charge devices such as smartphones or music players that are charged via USB to the USB port of this unit.

USB Playback

Do you have countless MP3 songs stored on USB data carriers (hard disks or sticks)? Then connect the data carrier via the USB interface to play the music directly on the unit.

Bluetooth streaming

Bluetooth audio streaming lets you transfer music from your smartphone, tablet or PC to the unit without a wired connection and in the best quality.
