Under-cabinet DAB+/ FM clock radio with CD player

Colour

PRODUCT DETAILS

The DIGITRADIO 20 CD is the perfect DAB+ radio for anyone who has very little storage space in the kitchen, for example. The radio can be used elegantly as an under-counter kitchen radio and thus saves valuable space on the shelf or in the rack. (Mounting accessories are included.) In addition to the radio function, the unit has an integrated CD player that plays both audio CDs and MP3 CDs. When preparing meals, you can also use the practical timer to record the time. Of course, the radio can also be used freestanding. With its chic OLED display and the aluminium rotary controls, the DIGITRADIO 20 CD cuts an excellent figure not only in the kitchen. The unit can be extended with an external antenna via the antenna connection for even better reception.

Undercabinet radio

This radio is ideal for rooms where storage space is limited. For example, in the kitchen, where precious storage and working space should remain free. Or in very small kitchens, garages or hobby cellars. The radio can be mounted under a wall cabinet in a space-saving way thanks to the mounting plate and mounting accessories included in the delivery. This means that the unit does not take up valuable storage space.

DAB

DAB+ digital radio is noise-free radio with extremely robust reception. DAB+ contrasts the regionally limited FM programme offering with many radio programmes broadcast nationwide in the best digital quality. In addition, there are numerous regionally broadcast stations.

FM/ RDS

Receive classic FM radio stations in your reception area. Via RDS (Radio Data System) you also receive extended programme information and alternative additional frequencies to the FM radio station you are listening to.

Watch

In addition to channel and other programme information, you can also display the time on the

integrated display. The clock information is transmitted electronically with the programmes received, so the correct time is set automatically.

CD player with MP3 function

You can listen to your entire CD collection on the integrated CD player. The CD player supports classic audio CDs as well as CD-R and CD-RW formats. In addition, you can also play MP3 CDs.

Equalizer

Manually control and adjust treble and bass to achieve an individual and optimal sound mix.

What's in the box

- DIGITRADIO 20 CD
- Throw-out antenna
- Mounting accessories
- Power supply unit
- Operating instructions
