PRODUCT DETAILS

MULTIROOM WIFI SPEAKER

Take your home entertainment to the next level with s-Living Three's rich and powerful sound. Engineered to comfortably fill up any large living spaces and is guaranteed to uplift any occasion from unwinding at home after a long day at work to a spontaneous house party. The perfect choice for those who want to enjoy full, immersive sound but don't want speakers that take up a ton of floor space to do it. Want an even more expansive experience? Keep the music flowing through-out the house with the MultiRoom function. Add additional speakers across different rooms via Chromecast built-in or Airplay 2 to have your favorite podcasts or music follow you around from room to room. Designed with Swedish design ethos in mind — an emphasis on craftsmanship, functionality and reduced form — the speakers are constructed from high-quality materials and finished with premium fabric.

SMART HOME COMPATIBLE

Made with ease of use in mind, s-Living Three offers an uncomplicated setup experience and integrates into any smart home setup. Connecting the speakers to Wi-Fi, or pair them via Bluetooth (NFC also supported) to your smartphone, is just one tap or click away. Built to work with Chromecast built-in, AirPlay 2 and Spotify Connect, your smartphone allows you to control the speakers no matter where you are in the house. AirPlay 2 - AirPlay 2 is a highly efficient and user-friendly streaming technology from Apple. Chromecast built-in - Chromecast built-in allows you to stream your favorite audio from any supported App to any Chromecast built-in certified speaker. This works with both Android and Apple devices. Spotify Connect - Spotify Connect enables you to stream music from Spotify to any Spotify Connect certified speaker that is connected to your Wi-Fi. Spotify Connect requires a Wi-Fi connection and works on only one speaker at a time.

TOUCH CONTROLS

Engineered with the latest inductive touch-sense technology, the intuitive touchpad at the top of the

speaker lets you enjoy a true seamless music experience at your fingertips. Easily cycle through functions and control your music through simple touch and swipe gestures. Looking to get the bass pumping or for warmer vocals to radiate through? s-Living Three's equalizers give you the power of sound-sculpting according to your preferences and mood of the moment. Choose among five pre-defined EQ settings - JAYS Signature Sound, pop, rock, jazz or classical to enjoy your favorite tunes. Use the I-II-III-IV Presets located on the touch panel to store and load your favorite Spotify playlists or albums (works with Spotify Connect). No one likes complicated software updates and installations, which is why s-Living Three automatically downloads and installs software updates in the background while connected to the Wi-Fi so that you can enjoy your music fully and without interruptions.
