PRODUCT DETAILS

Clarity and control

The S-DJ Series of active reference speakers is designed to give professional DJs and producers accurate neutral sound and excellent flexibility. Whether you are DJing, producing music or auditioning tracks, the S-DJ faithfully reproduce the original source – while a built-in linear EQ lets you fine-tune the frequencies as needed.

The S-DJ60X active reference speaker is sold as a single speaker.

High-force magnet and Bi-Amp circuit

Excellent reproduction of the original source and a b bass response.

Chimney shaped heat sink

Reduces resonance, eliminating unwanted noise and hum.

Inputs and extras

The S-DJ60X features 3 types of inputs (XLR, TRS and RCA) for connection to DJ equipment, computers and mobile devices. The speakers also include an Auto Standby that automatically turns itself off when there is no input signal sensed after 25 minutes and powers back on when signal input is detected.
