PRODUCT DETAILS

Dolby Atmos for 3.1.2ch with Surround Enhancer
The VSX-S520D supports up to 3.1.2ch Dolby Atmos (available with firmware update). Surround Enhancer (available with firmware update), developed by Dolby Laboratories, Inc., is a virtual speaker technology based on Head-Related Transfer Function (HRTF). With DSP, virtual surround speakers deliver the sound that usually comes from surround speakers. The 3.1.2ch is virtually expanded to 5.1.2ch to create 3D surround sound field. Even those who have difficulty installing rear speakers can also enjoy various audio formats (except audio signals encoded by DTS formats) in a wide sound field with Surround Enhancer, as well Dolby Atmos.

DTS:X®
DTS:X is the next-generation audio codec from DTS that leverages object-based audio to enable new immersive and interactive audio experiences. Since DTS:X can automatically adapt the audio to the existing channels and speaker system, no specific speaker layout is required. Experience an immersive soundscape with incredibly rich and life-like audio.

Reflex Optimizer
When using Dolby Atmos-enabled speakers, high directivity sound from the unit reflects off the ceiling, while low directivity sound directly reaches the ears. The different pathways cause a phase shift, making the sound feel uncomfortable. The Reflex Optimizer which uses the Phase Control technology adjusts this shift, and improves the localisation of the sound image by aligning the frequencies with those of the floor speakers, creating the ideal reproduction environment.

Next Generation Video Standard Ready
The VSX-S520D supports pass-through for HDR10. By connecting the source device, you can enjoy these latest video standards on a compatible display. What's more, all HDMI terminals support 4K, BT.2020, and HDCP 2.2, so you will have no problem when upgrading to new devices.

MCACC Auto Room Tuning

© 2024 ATS trade&service GmbH. All rights and changes reserved without notice.

Create the optimum acoustic environment with Pioneer’s MCACC (Multi-Channel Acoustic Calibration System), developed with the expertise of professional recording studios. With the custom microphone, the system automatically compensates for differences in speaker size, level and distance, and equalises response.

Synchronised Sound with Phase Control
As an innovative solution for the phase lag between the subwoofer and the main channel speakers caused by the bass management filter, Phase Control compensates the delayed bass
to improve sound synchronisation.

Built-in Dual Band Wi-Fi
Enjoy network features such as audio streaming via wireless LAN connection. The built-in Wi-Fi is dual band, supporting both 5 GHz and 2.4 GHz frequency channels. By using the 5 GHz band, you can enjoy steady and uninterrupted streaming of audio files.

Internet Radio & Online Music
Enjoy a limitless flow of music, sports, talk, and news entertainment from internet radio stations and online music services, including Spotify, TuneIn, TIDAL, and Deezer.

Multi-room Audio Offers a Variety of Ways to Enjoy Music
FlareConnect™ shares audio from network and external audio input sources (available after firmware update) between compatible components. Enjoy effortless multi-room playback of LP records, CDs, network music services, and more with supported components and speaker systems. Music selection, speaker grouping, and playback management across the home are built into the Pioneer Remote App.

Chromecast built-in
The VSX-S520D comes with Chromecast
built-in, so you can use your mobile device to
stream your favorite music, radio, or podcasts
to your speaker. You can control the audio from
anywhere in the house using Chromecast-enabled apps running on your personal device—iPhone, iPad, Android phone and tablet, Mac and Windows laptop, and Chromebook™. Discover Chromecastenabled apps at g.co/cast/audioapps.

DTS Play-Fi®
DTS Play-Fi (available with firmware update) wirelessly streams any audio content from any compatible mobile device to the VSX-S520D and DTS Play-Fi compatible audio systems, creating a multi-room system in your home. You can stream different sources to different speakers at the same time from the Pioneer Music Control App.
