PRODUCT DETAILS

Bring stereo sound to every room

The X-EM 16 is extremely compact and at about one kilo per component not too heavy even for filigree shelves – making it possible to find a suitable place for the CD receiver and the two stereo speakers in virtually every room. And the plain and elegant design fits seamlessly into any environment.

In addition to CD and FM radio, the X-EM 16 can also play MP3 files from USB flash drives, and, thanks to the auxiliary port, an additional audio player can even be connected to the system – such as a portable media player or a Chromecast Audio.

The X-16 EM is an all-round surprise package with a sound that is not at all as micro as the system looks, and which can be flexibly adapted to your listening habits with five EQ presets and switchable P-bass. The sleep and timer functions also make the system ideal for bedrooms or guestrooms, providing you with the comfort of a clock radio with the sound of a stereo system.

Audio features Main Unit

- Digital Amplifier
- Power Output: Total 10 W (1 kHz, 10 % THD, 8 ohms)
