PRODUCT DETAILS

Done With Frayed and Broken Cables?

We've all faced the frustration of USB cables breaking after several months of use. We keep buying one after another, and still have not discovered a durable cable that will hold up for a lifetime.

After a year of development, designing different braiding methods, trying different quality materials and thousands of tests, we've created the ultimate durable and stylish cable that comes with lifetime warranty – Zendure SuperCord.

Braided Cable

Each cable is woven with defense-grade fibers to enhance durability and flexibility. To provide all-around protection for the whole cable, we also reinforce the cable's construction with advanced technology.

Ultra Strong & Durable

Zendure SuperCord USB Cable is certificated by TÜV Lab, proving the high 50000+ bend lifespan at 180 degrees, which is ten times better than ordinary cables. Attached genuine leather strap: This convenient strap ensures that your cable doesn't get tangled up.

Superior Strain Relief & Reinforced Connector

With soft and flexible material, this strain relief helps absorb stress and reinforce the junction between the cable and connector. The fire resistant PVC protects the circuit board and chipset inside with a stainless steel connector.

Apple MFi-Certified & High Speed Charging

Zendure SuperCord Lightning Cable is certified by Apple for high-speed charging with compatible Lightning devices, which is up to 12W optimal charging.
