NS-6170 Network Audio Player, Black

156623
SRP 699,00 €

699,00 €

The NS-6170 combines the accessibility and usability of digital audio with the soul of analog, transforming how you experience music on your Hi-Fi system. A wideband DIDRC Filter enhances flagship dual-differential DACs at the heart of a separately powered twin-monaural L/R channel circuit layout. These technologies help articulate the distinctive and nuanced instrumental resonances contained in Hi-Res Audio signals, but with a richness and vitality seldom associated with digital listening.

PRODUCT DETAILS

Engineered for Hi-Res Audio
Hi-Res Audio contains more information and therefore more of the recording's atmosphere, allowing you to hear and feel things you miss with other formats. The NS-6170 is built from the ground up to preserve the fidelity of DSD 11.2 MHz and 192/24 Hi-Res Audio formats so you get a complete sonic picture.

Wideband DIDRC Filter
DIDRC (Dynamic Intermodulation Distortion Reduction Circuitry) Filter replaces standard DAC output filters. Hi-Res Audio covers a much wider frequency band than CDs, and conventional filters can't erase noise that falls outside that spectrum. This interference alters the harmonic character of audible sound. Wideband DIDRC Filter erases ultra-high frequency distortion for unparalleled fidelity.

Connect and Play HDD Audio via USB
Connect mass-storage-class HDDs via front or rear USB inputs and put your entire digital music collection at your fingertips. Use the new Onkyo Controller app to browse, select, and play albums from HDD quickly and easily. Note: HDD must be formatted to FAT32.

Chromecast built-in* for Mobiles and PCs
Chromecast built-in lets you cast audio from your mobile or laptop to the NS-6170. Control playback via familiar apps for iPhone, iPad, and Android™ devices as well as Mac, Windows®, and Chromebook™ computers.

* Enabled with a firmware update.

Stream Audio with AirPlay
Send app-based audio from Apple laptops, PCs, and iOS mobile devices to the Network Audio Player over AirPlay in moments.

Selectable Dual-band Wi-Fi®
Connected homes mean more network traffic. Dual-band 5 GHz/2.4 GHz Wi-Fi lets you select an uncongested channel for smooth and stable wireless streaming.

Any Music You Want, When You Want It
TIDAL, Deezer, and TuneIn streaming and internet radio services are conveniently accessible using the Onkyo Controller app or remote controller. This Network Audio Player also supports direct streaming from the Spotify Connect application.

Separate Power Supply Paths for Stereo Precision
The NS-6170 features a twin monaural layout for L/R channels with separate power supply paths, upgraded transformer, and extra-large audio capacitors for left and right DACs. This dual design enhances power stability and precision for extremely accurate stereo playback, adding authenticity and emotion to the musical experience.

Dual-Differential DAC Configuration
Flagship AK4490 768 kHz/32-bit DACs for L/R channels decode the positive and negative halves of the signal waveform separately. As well as improving voltage stability and dropping the noise floor, dual- differential DAC configuration increases bandwidth and pulls every detail from Hi-Res Audio.

Intuitive Control with Onkyo Controller app
Control playback from anywhere within Wi-Fi range, select and stream music from onboard services, and explore music on connected HDDs with a new, user-focused remote control application for iOS (Requires iOS 8.4 or later) and Android (Requires Android 4.0.3 or later).

FlareConnect™ Wireless Multi-room Audio
FlareConnect* shares audio from network and external audio input sources between compatible components. Enjoy effortless multi-room playback of LP records, CDs, network music services, and more with supported components and speaker systems. Music selection, speaker grouping, and playback management across the home are built into the

For more specifications, see the datasheet in the downloads tab.

Supplied Accessories

- AC Inlet Cable
- Instruction manual
- Remote controller
- AAA (R03) batteries x2
- Indoor DAB/FM antenna
