PRODUCT DETAILS

IXION Maestro is based on innovative solutions and advanced technology. Yet it's as easy as pie to use. You can connect up to 7 other IXION speakers, stream music and listen to more than 100,000 radio channels.

Designed by Bård Eker

IXION is designed from the inside out. That means that it sounds fantastic, has timeless design, maintains its high quality and is built to last. 100% quality. Always.

Unique distribution of audio signals through your electricity cables Power Line Communication (PLC) ensures that audio signals never deteriorate.

Sound that excites

2 powerful 2.75 front speakers and a 5.5 subwoofer. These are housed in a specially-built acoustic cabinet to minimise resonance and ensure optimum sound quality.

Access to more than 40 million songs and albums

Tidal and Spotify Connect preinstalled. Stream music – you can access just about all the music in the world.

100% quality.

Built to last. Aluminium top and base. Oversized electricity supply, 4 amplifiers and quad-core processor. Everything you need to extend lifetime and boost quality.

Plug in to the mains – and you're ready to play. Control using app or the integrated touchscreen.

Over 100.000 radio channels and more Whether you prefer online radio, DAB+, or FM. IXION Maestro gives you all the radio you want. Now and in the future.

Speakers

IXION Maestro is built with 2 powerful 2.75 front speakers and a 5.5 subwoofer. These are housed in a specially-built acoustic cabinet to minimise resonance and ensure optimum sound quality.

Preinstalled Services

Tidal, Spotify Connect and TuneIn are already installed on the IXION Maestro. The same applies to FM/DAB/DAB+ and online radio. Stream music from the built-in or other streaming services via your smartphone, iPad or laptop.

Quad Core Amplifiers

Oversized power supply ensures greater durability and better quality. Quad-core processor provides sufficient speed for high quality audio. 4 amplifiers help create incomparable audio. 24BIT/192 KHz lets you play high quality media files.

Audio Distribution

IXION sends the audio signals via your existing electricity network. The PLC has lots of capacity for high quality audio currents, whether CD quality (WAV files) or fast, high resolution (24bit/192KHz), and the power to handle future formats.

Updates

We are constantly working on product development of new features. Your IXION products will be automatically updated with new software.

Construction

Specially designed acoustic cabinet with aluminium top and bottom minimizes resonance. Electrical components housed in their own cabinet separated from speakers.

Dimensions

H:22 cm. W: 22 cm. D 22 cm.. Weight: 7.3 kg.
