19,99 €

The weather-resistant USB pass-through flap lets you connect your GoPro to an external power source during extra-long shoots. Using it as a webcam and charging the battery becomes even faster and easier.

PRODUCT DETAILS

Replace the standard GoPro flap with the weather-resistant USB pass-through flap for more shooting and mounting flexibility. It allows you to connect your GoPro to a power bank or other power source - ideal for extra-long shoots (with or without camera battery). The pass-through design also makes using it as a webcam and charging the battery even quicker and easier. The included cable or any other GoPro USB-C cable guarantees tight protection from rain and snow.

Key features

- An opening in the flap lets you connect your camera to an external power source while the battery stays securely in place
- Specially designed cable/flap seal makes your camera weatherproof for outdoor adventures (when using a GoPro USB-C cable)
- Easy access to the USB-C port makes it easy to use as a webcam and charge the battery
- Cable clip prevents accidental cable pull-out
- Pass-through design lets you power your GoPro from an external power source. You don't need a battery and the camera is lighter
- Includes a USB-C cable (1.37m) for increased distance between camera and power source

Included in delivery

- USB pass-through flap for HERO9 Black/HERO10 Black
- 4.5 ft. USB-C cable (1.37 m)

Compatibility

- HERO9 Black
- HERO10 Black

Warning

The USB pass-through flap is not waterproof. Using it underwater with your GoPro will damage the camera and void the warranty.
