LUNA

PRODUCT DETAILS

Ideal for the home office and conference calls

The Luna conference loudspeaker is the ideal addition to your home office. When using the Luna conference speaker, you have the feeling that your business partner is right next to you, even though you are working from home. Based on the previous models, Luna not only improves the algorithm to achieve better call quality, but also supports a daisy chain function, which allows more participants to join a table by connecting two Luna conference speakers.

360° voice recording & intelligent AI microphone array

The Luna speakerphone works perfectly for meeting rooms with up to 5-6 people, as well as for use in your home office without having to hold your cell phone too long or sit too close to your computer. And for those times when you don't have access to a separate and quiet office, the Luna can also block out echo and noise, and offers superior voice quality thanks to the patented Voice IA algorithm. With 3 KI Array microphones, voices are reproduced crystal clear and unwanted echoes as well as ambient noise are simply cut out.

VoicelA patent guarantees immersive sound

Unlike other hands-free kits, the eMeet portfolio features its own patented noise reduction technology. The eMeet conference speaker is capable of delivering crystal clear HD audio quality through the use of the VoicelA algorithm. Acoustic echo cancellation completely eliminates echo, and the noise-isolating microphones ensure a superior experience even in noisy outdoor environments. Whether you're in a meeting room or your home office, simply make calls and enjoy lifelike communication.

Multiple connections & high compatibility

No driver required, just plug in and get started: Using the eMeet Luna handsfree saves time when troubleshooting devices. You can easily connect to your cell phone, tablet, PC or laptop using the Bluetooth / USB or AUX input/output cable. Not only in terms of hardware but also in terms of software compatibility it has been tested and optimized for common communication platforms like Zoom, Skype, Webex, Facetime and Google Hangout. operating systems: Windows 7, 8 and 10 as well as Mac OS, Android, iOS and other common operating systems.
