## Hombli Smart Water Controller

250067  
SRP 79,95 €

**79,95 €**

Keep your garden green with the Hombli Smart Controller. You can exactly choose on what day, how long and how often you want your garden to be watered. This prevents your plants from getting too much water, and you won't have to worry anymore about turning off the sprinkler. The watering system consists of 2 items: a controller and a gateway, which you easily control with your smartphone or tablet to automatically water your garden. The controller delivers the right amount of water. The gateway provides the connection between the sprinkler and your smartphone.

### PRODUCT DETAILS

#### Control with your smartphone

In the Hombli app you easily turn your Hombli Smart Water Controller on and off, check your water consumption and set customized time schedules. Wherever you are and whenever you want.

#### Automatic irrigation

Thanks to the smart irrigation system of the Smart Water Controller your lawn, patio plants, flower beds and hedges stay in top condition. While you are laying in the garden or on the couch, your water controller is watering the garden. This is easily set up in the app. You can choose between 2 watering features: Continue (watering without intervals) and Pulse (watering with intervals).

#### Turning of automatically with timers

Prevent your garden from flooding or overwatering your plants by setting a timer or schedule. Your water controller switches itself off automatically at a specific time, set up by you in the Hombli app.

#### View current water consumption

Would you like to keep an eye on your water consumption? In the free Hombli app you can check the current consumption 24/7. To regulate the consumption, you can set time schedules, create smart scenarios or turn on the Pulse feature to save water and therefore costs.

### **Designed for outdoor**

The Smart Water Controller is resistant to external influences. The controller is both sunlight-resistant and IP54 waterproof (splash-proof and resistant to dust). When it freezes, you must remove the Smart Water Controller from the water tap to prevent damage from freezing.

### **Voice control with Amazon Alexa, Google Home or Siri**

Is your phone out of reach? Ask Alexa, Google Assistant or Siri to activate your water controller. Connect the water controller to a Google Home Mini Speaker, Google Nest Hub or Amazon Echo Dot and control your water timer handsfree with your voice.

### **Easy installation on almost any water tap**

Screw the Smart Water Controller onto the water tap (compatible with 1" (33,3mm) and 3/4" (26,5mm) threads), attach the garden hose to the Smart Water Controller and follow the instructions in the app to successfully install your Smart Water Controller. You can easily connect the smart water controller to your WiFi network via the Hombli app.

### **What's in the box?**

1. Smart Water Controller
2. Smart Gateway
3. Tap adapter
4. Battery compartment (4x AA batteries are not included)
