

Ecovacs WINBOT 920 window cleaning robot, white

249485
SRP 399,00 €

399,00 €

WINBOT 920 delivers sparkling clean windows inside and out. Thanks to WIN-SLAM 2.0 technology, edge detection for frameless windows, multiple cleaning modes and its sleek design, WINBOT 920 works particularly efficiently. It has a user-friendly voice assistant and can be easily transported in the new storage bag.

PRODUCT DETAILS

WIN-SLAM 2.0 Navigation

WIN-SLAM 2.0 technology allows WINBOT 920 to reliably clean flat glass surfaces in a thorough back-and-forth cleaning path. WINBOT generates a systematic cleaning path that guarantees complete coverage as well as its return to the starting point.

Anti-Flare Edge Detection Technology

Whether the glass is framed or not, WINBOT 920 detects all edges and intelligently adapts its cleaning process to the surface. This makes it the ideal household helper in various situations such as cleaning mirrors or conservatories.

Microfibre cleaning cloth

WINBOT 920 uses an improved microfibre cleaning cloth that gives it excellent water absorption, helping to ensure streak-free clean glass surfaces.

Multiple cleaning modes

The robot's three cleaning modes for window cleaning can be used as needed: Automatic window cleaning (standard), the thorough deep cleaning (in two different routes) and the intensive spot cleaning mode (for heavy soiling).

Intelligent safety system

WINBOT's multi-level safety concept offers intelligent solutions for all situations, so that even cleaning high windows is completely safe and uncomplicated.

Automatic start and position memory

Once successfully attached to the glass surface, WINBOT 920 automatically starts cleaning the windows and then returns to the starting point. If the window cleaning is interrupted, WINBOT keeps track and resumes its planned route after the break.

Intelligent control

The intelligent operating system can be easily controlled via app - you don't need a remote control to clean windows. WINBOT 920 is ECOVAC's first window cleaning robot with app control and voice assistance. It gives you real-time information on its status and always stays up to date with over-the-air updates (OTA).

Powerful suction and a carabiner guarantee safety

WINBOT's advanced suction fan attaches it securely to the glass and also provides powerful wiping action to thoroughly clean your windows. In the unlikely event that the attachment fails, a highly elastic cord and a heavy-duty carabiner further ensure your safety.

Portable storage bag

This is the first portable storage bag in the WINBOT family. It is easy to store and convenient to carry. Keep your WINBOT safe at all times.

Box contents

- Robot
- Power supply
- Safety rope
- Cleaning cloths (sets) x4
- Polishing cloth
- User manual
- Cleaning solution
- Protective storage case
