SRP 275,00 €

275,00 €

Normatec's restorative massage increases circulation and helps you maintain your full range of motion, leaving you fresh and limber.

PRODUCT DETAILS

Design

All attachments are anatomically designed with reinforced stitching and premium materials for trusted durability and quality. Gapless compression ensures accuracy with Normatec's patented Pulse Massage Pattern. Leg attachments are available in three different length sizes, power and widths for extra room to provide a tailored fit.

Features

Portability

Compact and lightweight (3.4 lb device) and an integrated battery make it easy to travel with the system and enjoy recovery benefits on-the-go.

Customized Experience

Tailor time, pressure, and zone settings in both devices.
Select from three different programs on the Pulse Pro 2.0:

- **Recovery Flush** – cycles through Normatec's patented pulsing action for the allotted amount of time at the set intensity level.
- **Rehab** – offers preprogrammed settings for the attachment being used (legs, arms, or hips).
- **Custom** – select exact time and pressure you would like in each zone.

Zone Boost

During your session, you can increase the intensity of a single zone with the Zone Boost feature. This feature is designed to be used when you want extra attention in a specific area. It will add an extra 60 seconds of massage time, as well as 10mmHg increased pressure, in the selected zone.

Digitally Connected: Normatec App

- Control your device from your phone
- Save and restore favorite settings
- Track and share recovery stats
- Upload recovery data to your other training and tracking apps (Strava and Training Peaks)

Normatec started as a medical company – science is in our DNA.
Studies show that Normatec’s patented technology:

- lessens pain sensitivity
- increases ROM
- treats DOMS
- decreases muscle fatigue
- clears metabolites passively
