## PRODUCT DETAILS

**The new generation of simplicity.**

Even though the new emporiaSMART.3mini is characterized by its ease of use as an essential feature, it is completely intelligent, highly complex and technically state of the art. Due to its compact size, it fits in any shirt or trouser pocket and still has 3x2.5 cm icons.

**Great picture experiences**

The emporiaSMART.3mini has 2 cameras, a main camera with 8 MP resolution and a front camera (to take pictures of yourself) with 2 MP resolution and flash function. Videos can also be recorded with it. You can find your pictures and films in the picture gallery on the start screen. The internal memory of 16GB can be expanded with an SD card up to 64GB.

**Emergency call function yes or no - that's your decision thanks to 2 battery covers included**

You can save up to 5 contacts from your phone book as emergency contacts. These are alerted in turn when you trigger the emergency call. You can do this by pressing the emergency button on the back of the device for 3 seconds or by tapping on the field with the heart on the personnel screen. Please refer to the operating instructions for more information.

**The start screen**

The emporiaSMART.3mini has 3 screen views. The start screen (also called home screen) shows the current date and time on the background image. If you touch the symbol for the battery level, the settings or the network at the top of the screen, their current status is displayed. Below you will find four fields for your telephone contacts, SMS messages, the picture gallery and the information centre, which shows you at a glance whether you have missed calls, messages or e-mails have been received. You can of course adapt the background image and the 4 functions on the start screen to your requirements.

### **The app screen**

If you slide the homescreen with your finger to the left, the so-called app screen appears. Here you can see applications such as camera, alarm clock, calendar, weather, calculator, email and the Internet. You can determine the sequence yourself. Behind the "All apps" field you will find all the applications that are already available on your phone. There is also a selection of apps that are pre-installed, selected by simply clicking on them and can be used immediately. You can also install other apps from the Google Play Store.

### **The personal screen**

This individually adjustable screen page appears when you slide the homescreen to the right. Here you can select 4 contacts from your phone book that you would like to call frequently. Touching the appropriate field starts the call to that contact. Your own number is automatically displayed here and can be forwarded to other contacts or edited by touching it. You can make your emergency call settings and listen to your answering machine by tapping on the fields below.

### **Big characters**

The SMART.3mini has a large 5 inch screen with very easy to read text and is also suitable for the ones having a hard time hearing. Large symbols (3x2.5 cm), numbers and numbers facilitate entry. The powerful battery enables a talk time of up to 550 minutes and a standby time of up to 168 hours. For those who have not yet used a touchscreen phone, the touch trainer in the apps helps to get the right feeling for how to touch the screen so that it responds correctly.

### **The easy entry into the smartphone world**

In addition to the operating instructions for the technical details and commissioning, the emporiaSMART.3mini comes with a training book. With this learning aid, even digital newbies can easily enter the world of smartphones. This explains step by step what you need to know to be able to use your smartphone safely. Questions such as: What can my smartphone do? What should I watch out for when I use it? Can I break it? Operate without buttons? Why is everyone talking about apps? All so that you will have an easy time getting used to your new smartphone.
