A speaker with a modest footprint and rounded design, that makes a space savvy addition to the smaller room. The fabric front perfectly complements modern interior design trends, allowing a complete color match for your home.

Colour

PRODUCT DETAILS

A speaker with a modest footprint and rounded design, that makes a space savvy addition to the smaller room. The fabric front perfectly complements modern interior design trends with the choice of two shades of grey, allowing a complete color match for your home.

The speaker has an astonishing sound, despite its compact size. The unconventional use of a dedicated woofer and the BMR technique makes it possible to get both deep bass as well as clear details in your highs and midrange.

All rooms liberated

Have a speaker in every room and play to one or all at the same time. Everybody can play their personal music on whichever speaker they want. Play from internet streaming services, from a computer or NAS in your network, or music on your phone. All controlled by the App of Simplicity.

Music should be felt

The Audio Pro renowned sound quality is always present. Feel every detail in your music.

All the music you need

Well, we don't have every single little music service on the planet, just the ones that count.

Play nice. Everywhere.

Multiroom sound and multi person usage. Group and play, set to left/right for stereo pairs. Play all together. Or not. You choose.

Wifi Presets - Play direct

No need to start fiddling with your phone, just push and play. Save your favorite radio station or playlist to a button simply by pressing it while playing content.
