Sturdy and water resistant outdoor or construction site radio that can be powered either via cable or via the included battery pack.

Colour

### PRODUCT DETAILS

Whether you're in the garden, the garage or on a large building site, the DIGITRADIO 230 OD is the ideal music companion for situations where tough, and often hectic work is taking place in challenging circumstances. With its robust housing protected from dust and water in accordance with IP 65, the radio proves to be an excellent piece of equipment, protecting electronics from minor impacts or blows.

Safety is of paramount importance in the building site sector especially. Hence, in addition to operating from the mains power supply, the DIGITRADIO 230 OD can be easily operated via a rechargeable battery and so can be used flexibly without compromising safety by cluttering up with cables. The device is also very easy to pick up and move even when wearing gloves, thanks to the two large hard rubber handles. And, once the DIGITRADIO 230 OD is in place, it will impress with its wide variety of stations via DAB+ digital radio, playing music from smartphones via Bluetooth, or acting as a charging device for mobile devices via the USB connection.

Now you will be able listen to smooth stereo sound quality on the building site or anywhere with wood shavings regularly falling from the planing process.

#### DAB

DAB+ digital radio is noise-free radio with extremely robust reception. DAB+ contrasts the regionally limited FM programme offering with many radio programmes broadcast nationwide in the best digital quality. In addition, there are numerous regionally broadcast stations.

#### FM/ RDS

Receive classic FM radio stations in your reception area. Via RDS (Radio Data System) you also receive extended programme information and alternative additional frequencies to the FM radio station you are

listening to.

**Watch**

In addition to channel and other programme information, you can also display the time on the integrated display. The clock information is transmitted electronically with the programmes received, so the correct time is set automatically.

**Alarm clock / sleep timer**

This unit has practical sleep timers with numerous adjustable switching times. This allows you to wind down comfortably in the evening without having to worry about switching it off. Via the integrated radio alarm function, you can be woken up by your favourite programme if you wish.

**Equalizer**

Manually control and adjust treble and bass to achieve an individual and optimal sound mix.

**Bluetooth streaming**

Bluetooth audio streaming lets you transfer music from your smartphone, tablet or PC to the unit without a wired connection and in the best quality.

**USB charging**

You can charge devices such as smartphones or music players that are charged via USB to the USB port of this unit.

What's in the box

- DIGITRADIO 230 OD
- Rechargeable battery pack
- Manual
