Pocket-sized FM/DAB+ portable radio with build in torch function and rechargeable battery, perfect for when you're out and about!

Colour

#### PRODUCT DETAILS

Pocket-sized DAB+ radio! Thanks to the replaceable rechargeable battery, the TECHNIRADIO RDR constantly offers you a range of digital programming even when you're out and about. Apart from digital radio programmes via DAB+, this compact device also receives all the FM stations available in the local area and is able to play MP3 music files from connected USB data media.

The two-line LCD provides helpful information on the current radio programme, and the large favourites memory and four configurable station direct selection buttons ensure excellent ease of use. In addition to the headphone output, the TECHNIRADIO RDR also has an AUX IN interface, via which you can connect external music sources such as a smartphone.

Extremely practical: at the press of a button the compact radio becomes an LED torch, thus ensuring that you don't get lost in the dark.

What's in the box

- TECHNIRADIO RDR
- USB Cable
- Manual
