### PRODUCT DETAILS

Bring your smart home outside with the outdoor smart socket from Hombli. You easily connect this weatherproof smart plug to your outdoor lighting, jacuzzi or patio heating in seconds, which allows you to control your devices from anywhere, anytime with your smartphone. The outdoor socket measures the energy consumption of the connected devices. To save energy, you can set timers or time schedules to your own preferences. It's possible to control the outdoor socket with your voice via Siri, Google Assistant or Alexa.

#### Quick and easy installation

Plug the smart outdoor socket in the power outlet, make sure the Wi-Fi signal in the garden is enough and select the device in the free Hombli app to pair it to your Wi-Fi network (2.4GHz). You don't need an extra bridge or hub.

#### Control with your smartphone

In the Hombli app you easily switch your outdoor smart socket on and off, check your energy consumption and set customized time schedules. Wherever you are and whenever you like.

#### Enjoy the comfort of time schedules

Do you ever forget to turn off your outdoor lighting? With personalized time schedules and timers you can choose exactly when you want your devices to automatically turn on and off, without your interference.

#### Save energy costs

Check the current energy usage of your smart socket in the Hombli app. Using too much? By setting schedules and timers you can save energy and cut costs. The planet will be happy with you. And your wallet too.

#### Designed for outdoor

The Hombli Smart Outdoor Plug is IP44 waterproof. This means it's resistant to rain, but also to dust. You can safely place the socket next to a garden pond or swimming pool.

### Easy home automation

Use smart scenarios in the app to easily automate your Hombli device. Automatically activate the smart plug as soon as it's dark outside or automatically switch off during specific hours. The possibilities are endless.

### Voice control with Amazon Alexa, Google Home or Siri

Easily switch on your smart socket by using nothing but your voice. The outdoor smart socket can be connected to a Google Home Mini speaker, Google Nest Hub, Siri or Amazon Echo.

### Combine your smart home devices

Your house truly becomes smart when 2 or more devices operate together. Combine your smart outdoor socket with an outdoor camera on the porch for example, and let them turn on at the same time. Hombli is cross compatible with other brands that support Tuya smart technology.
