PRODUCT DETAILS

Intuitive layout

All of the features were designed to be where you need them, when you need them. The layout inherits elements from our DDJ-S series with jog wheels, Performance Pads, play and cue buttons, independent Auto Loop buttons and all knobs and fader positions arranged in an easy-to-reach way that mimics professional gear.

Pad Scratch

Add scratch effects to cued and currently playing songs without a turntable thanks to Pad Scratch. This new effect lets you reproduce, and create patterns from, eight of hip hop legend DJ Jazzy Jeff's different scratch recordings. As the speed automatically matches the BPM, you won't need to worry about breaking rhythm.

Smooth transitions

Whether you're an experienced DJ or beginner, mixing is seamless with the FX Fade feature. By reducing the volume and applying FX at the same time, FX Fade smoothly blends tracks - even those from clashing genres. Choose eight combinations of the following four FX patterns - high pass filter, low pass filter, loop playback and back spin.

Durable Design

The DDJ-SB3 is constructed from premium materials and audio circuitry. Its robust build ensures durability, while the distinctive styling and aluminium jog wheel deliver a professional feel.

Large Jog Wheels

It may be compact, but the DDJ-SB3 features large, low-latency jog wheels to give you great scratch response and accuracy.

On-board Serato sound card

Simply connect to your PC/Mac via USB to get plug-and-play control of Serato DJ Lite, no need for an external sound card.

Portable Design

Take this controller with you wherever you go thanks to the easy grab handles and lightweight design. Simply connect the USB cable to begin playing.
