339,90 €

The next generation HDJ-2000MK2s inherit all the best from their predecessor, the HDJ-2000, and add optimised audio quality, enhanced sound isolation, maximum comfort and an even more robust build.

Colour

PRODUCT DETAILS

Sound isolation

The ear pads' low-volume air chambers provide maximum insulation, reducing external noise in the mid to low frequencies. Plus their damper and airtight stitching ensure clarity for ease-of-monitoring without needing to crank up the volume in loud clubs.

Maximum comfort

Designed for maximum comfort and durability, these headphones have lightweight bindings on the headband and hanger to reduce the pressure on your head. Their soft, leather-like ear pads with memory foam ensure a snug fit – whether you're performing in a packed club or producing in the studio.

Rotatable housing

Each ear cup swivels a full 90 degrees, while the auto-return feature makes them ideal for on-the-shoulder monitoring. Plus the rugged swivel/fold mechanism and hard carry case means they're easy to transport between gigs.

Built for professional use

An L-type mini-jack stops the headphones getting knocked or disconnected during performance, even in cramped booths. At the headphone end, a detachable mini-XLR connector means cables can easily be removed for transit or replaced if damaged.
