In-Ear Headphones with strong 10 mm Rare-Earth-Magnet Driver and Inline-Remote

Colour

PRODUCT DETAILS

REFRESH MIND AND BODY WITH PREMIUM SOUND
Add muscle to mobile listening with the QL2 (SE-QL2T) from Pioneer. Distinctive yet subtle color-coordinated style shifts focus to seriously great sound: bass is deep and taut thanks to 10 mm rare-earth-magnet drivers. Low-frequency vibration is tamed by aluminum housings for clear reproduction of nuanced details. Metal surfaces gleam with a high-texture alumite-processed finish, while circular spinprocessed accents on the earphones add to the aura of quality. Playback is clean, fast, and full of energy. Pair the QL2 with your smartphone, take and end calls with cable remote, and let powerful bass get you where you're going.

RARE-EARTH-MAGNET DRIVERS ENCASED IN ALUMINUM
Rare earth magnets are ber and more powerful than regular driver magnets. They deliver extra punch for deep, taut bass, fast dynamics, and an expressive mid-range. Aluminum housings stop vibration from blurring details in your music, and they look fantastic too.

SPIN-PROCESSED ALUMINUM ACCENTS
Alumite processing adds high-texture sheen to the earphone exterior. A circular spin-processed accent catches the light, emphasizing an aura of quality. Coordinated color schemes blend with your clothes, bringing style and sound together in a package that reflects your love of music.

EASY PHONE CONTROL
Accepting and ending calls on the go is simple. A lightweight remote on the cable features a single button that's easy to use without stopping to look. The mic and control signals work with most smartphone brands.

AUDIO FEATURES

- Type: Fully enclosed dynamic headphones
- Driver: 10 mm enclosed rare-earth-magnet dynamic driver
- Impedance: 16 ohms
- Frequency response: 4 Hz–22 kHz
- Sensitivity: 101 dB
