PRODUCT DETAILS

Superior Portability & Compactness

Tiny as a credit card, SuperMini is 30% smaller than a traditional 10,000mAh external battery, so it fits in virtually any bag or pocket. SuperMini uses a battery cell called 21 700. Each cell provides 5,000mAh of charging capacity, making them 50% more energy-dense than the cells used in a typical chargers. With SuperMini in your pocket, you are carrying a mini power station for your trip. Mini size, zero burden.

Charge Fast, High Performance

SuperMini is equipped with 2 USB ports, a USB-C port for input and output as well as a USB-A port for output. With 18W Power Delivery (PD), SuperMini can charge the iPhone X to 50% in 30 minutes and takes only 3 hours to recharge itself, which can save 45% in time (compared to traditional 5V/2A, 5.5hs recharge). The USB-A port supports ZEN+2.0 with Adaptive Quick Charge, taking advantage of the rapid-charging capabilities of compatible QC 3.0 devices.

Power Up in Style

SuperMini is available in Black, Silver, and our stunning new Blue Horizon. We boldly adopted this distinctive blue ombre color, which is usually seen on high-end smartphones but very rare on portable chargers. This distinctive Blue Horizon color with an extra compact design matches any fashion style. Its classic suitcase-look design makes it extremely durable. SuperMini is an external battery that is both stylish and sturdy.

Massive Power, Universal Compatibility

Credit-card-sized with 10,000mAh of charging capacity, SuperMini conveniently maintains 1-2 days of mobile power for flagship phones and tablets and can almost double the battery life of smaller laptops. SuperMini's broad compatibility extends to Apple, Samsung Galaxy, Huawei, OnePlus and Nintendo products just to name a few.

Function Superiority

- With 2 USB port outputs, SuperMini can charge two devices simultaneously.
- SuperMini features pass-through charging function, which allows you to charge its internal battery while charging your devices.

Included Accessories

- Zendure SuperMini
- User Manual
- USB-C to USB-C & USB-A Cable
