Modern air purifier for rooms up to 50 m². Comes with Blue Diva and Dark Shadow filters.

PRODUCT DETAILS

HEPA filter unit with integrated smoke filter
This air purifier comes with a combination filter that neutralises particles as well as tobacco smoke and various odours. With the help of the activated carbon, which is incorporated into the filter as a net, it effectively filters odours from the kitchen, cellar, cigarette smoke, animal odours and gases.

Operation
Operation works very effortlessly via touch screen, and changing the filter with a twist motion is equally simple.

Design
The air purifier works with a 360° all-round air intake. Compared to other devices, the unit is extremely power-intensive. The purified air is discharged upwards. Due to the pre-filter, which can be selected in a colour that can be adapted, the modern - yet timeless design of the Blue Pure 221 integrates ideally into any room. The white part is the combi-filter HEPA/smoke.

Silently at work
Thanks to the low noise level, the Blue 221 air purifier can even be used in the bedroom at night on the lowest setting.

For more specifications, see the datasheet in the downloads tab.
