229,95 €

Always breathe in healthy and clean air with the stylish Hombli Smart Air Purifier XL. This powerful air purifier removes up to 99,97% of all bacteria, viruses, pollen, pet dander and other harmful particles in spaces up to 75m². Ideal when you have pets, allergies like hay fever or when clean air is simply important to you. With your smartphone you check and manage the air quality anywhere, anytime. This way you create a healthy environment for you and your family.

PRODUCT DETAILS

Efficient 3-Layer Filtration

Removes viral aerosols, bacteria, viruses, pollen, pet dander, dust mites and 99.97% of other harmful particles as small as 0.3 microns. Active Carbon absorbs bad smells. The filters are replaceable and last about 1 year, depending on usage.

Ultra Violet

Integrated UV-X light inactivates microorganisms to efficiently disinfect the air in your house.

3 Purification Speeds

3 different fan modes for any situation. In Auto Mode the purifier monitors air quality and adjusts fan speed all by itself. Choose High to clean the air quickly or Low to enjoy clean air in near silence.

Monitor Air Quality

Check real-time air quality via the Hombli app from anywhere. When at home, the LED indicator on the control panel displays the current air quality with colors ranging from blue (good), yellow (average) and red (bad).

Smart Features

Set up filtration schedules and automation with the Hombli app. Create smart scenarios to give the air purifier the task to automatically turn on before you arrive home. Or set up a time schedule so the speed is set to low when it's time to sleep

Voice Control

Do you own a speaker or smartphone with voice assistance? Use Amazon Alexa, Google Assistant or Siri to control the Smart Air Purifier completely hands-free with your voice. No need to get out of bed to turn it down at night.

Perfect for large spaces

The high efficient purifier can clean the air in rooms up to 75 m². With a maximum Clean Air Delivery Rate (CADR) of 300 m³/h, it can quickly clean the air in any large living room, kitchen, (home)office or other spaces up to 75m².

Performance specifications

- Perfect for large rooms up to 75m²
- Removes 99.97% of particles as small as 0,003 micron with CADR: 300 m³/h
