PRODUCT DETAILS

Overview

The Pro-Ject Phono-Debut III BT SB Phono is a minimalist and high-quality turntable with Bluetooth function and preamplifier that offers excellent audio enjoyment at a fantastic price. The turntable is equipped with an Ortofon OM5e cartridge which, together with the low-resonance Pro-Ject 8.6 tonearm made of Aluminium, achieves a playback quality that is often unrivalled in this price range.

Bluetooth & Phono Preamplifier

The Debut III BT SB Phono has a phono amplifier, which ensures connection to conventional systems and amplifiers that do not have a turntable input. The Bluetooth functionality allows owners without a hi-fi system to enjoy a vinyl record wirelessly. Simply via Bluetooth headphones or speakers.

High-density MDF cabinet construction

Unlike other units with plastic chassis, a single wooden panel with high-density MDF minimises vibration and resonance to reproduce any record collection with clearer sound. Gold-plated Cinch/RCA jacks lend the cabinet a valuable appearance and guarantee a grandiose sound.

Precise belt drive and 3 speeds

The turntable is driven by a high-torque DC motor, while the precision stainless steel spindle and durable brass spindle holder ensure precise rotation speed. Records can be played in 3 speeds (33/45 + 78 rpm), which is controlled by an electronic switch.

Scope of delivery:

- Debut III with Ortofon OM5e
- Semi-symmetrical phono cable with metal plug
- Dust cover
- Felt mat
- Adapter for 7" singles
- 78RPM belt
- Power supply
