AUDIO PRO P5, Portable Wireless Loudspeaker - Bluetooth - IPX4

Colours: Black

Portability made easy.

[FULL DESCRIPTION]

P5

The small, portable P5 will let you play your favourite music wherever you are. The small wireless speaker has a battery that will last 14 hours in mid volume level, and even longer at lower volume levels. That will give you plenty of time to enjoy your time at the beach, in the garden, on a picnic or any other outdoor activity. At max volume you can have the party going for 4 hours. The speaker can withstand rain (IPX4), so you do not have to worry about the bad weather forecast.

Unlike many of the travel speakers, which are only utilizing a fullrange driver to try to handle the complete frequency range, the P5 is a true 2-way speaker. The 1" dome tweeter paired with a 3,2" mid woofer covers a frequency range at normal listening levels similar to a small bookshelf speaker.

The speaker connects via either Bluetooth 5.0 or AUX 3,5, and since the P5 offers a true wireless connection, this means that you are able to connect two P5 speakers into a great sounding true stereo pair, enhancing the experience even further.

The Audio Pro P5 is the perfect travel companion. As a travel speaker designed to easily fit into full stacked suitcases, you are able to listen to music throughout your whole trip. The slimline design, will let you bring the speaker with you even in smaller handbags, or simply use the practical strap, to carry it easily by your wrist.

TOP 3 FEATURES:

The perfect portable travel speaker, tiny in size, huge in sound.

You do not have to worry about the weather, the speaker is able to play in the rain as well.

The true wireless feature will let you connect two P5 speakers by Bluetooth into a true stereo pair
