TrueMapping
OZMO™ Pro mopping
Powerful suction system

Live Smart. Enjoy Life.

DEEBOT OZMO T8

DEEBOT OZMO T8 is the first vacuum and mopping robot with state-of-the-art TrueDetect 3D technology. With structured light technology and a 3D scanning algorithm, the robot scans surroundings extremely precisely and detects even the smallest obstacles in the room to avoid collisions, getting stuck or tangled. Equipped with brand-new TrueMapping technology, it maps your home with 4X the accuracy.* A deep clean with superior cleaning efficiency is ensured with ECOVAC's powerful pressure-retention suction system as well as the new and unique OZMO™ Pro mopping technology that consists of a water tank with a high-frequency vibrating mopping plate, ideal for dealing with stubborn stains. Features like virtual boundary setting, carpet detection, individual scheduled room cleaning and multi-floor mapping make cleaning more convenient.

compared to DEEBOTs with standard laser navigation

KEY TECHNOLOGIES & PRODUCT BENEFITS

TrueDetect 3D

Avoids collisions, getting stuck or tangled

The state-of-the-art TrueDetect 3D obstacle detection and avoidance technology detect even the smallest obstacles in the room. DEEBOT OZMO T8 can therefore recognise very narrow spaces, thin chair legs, small objects and door thresholds to avoid collisions or getting stuck. This technology also enhances dark-surface recognition ability.

TrueMapping

Plans cleaning way precisely

TrueMapping technology with D-ToF laser detection is the next generation of laser guidance technology. The robot can now detect double distance (up to 10 m) with much higher precision. Integrated with industry-leading algorithms, DEEBOT OZMO T8 scans, maps and plans an efficient cleaning path faster and more precisely. Larger family homes in particular benefit from this.

OZMO™ Pro

Powerful vacuum and mopping

With the new OZMO™ Pro system, the robot does not just vacuum and mop in one go – it also includes a mopping plate that is electrically powered and works with high-frequency vibration to deal better with stubborn stains.

Powerful suction system

Superior cleaning results

DEEBOT OZMO T8 uses a roller brush combined with dual side brushes to attack everything from dust to dirt. With an optimised design and suction channel material, the powerful pressure-retention system optimises energy efficiency and ensures high vacuum pressure with a surprisingly low noise level.

Specification

Name	DEEBOT OZMO T8
Noise Level	ca. 67 dB
Charing Time	ca. 6,5 hr.
Battery	Li-ion, 5200 mAh
Max Working Time	ca. 175 Min.
Dust Bin Size	420 ml
Doorsill Crossing	ca. 2.0 cm
Weight	4,7 kg
Dimension of the robot	353 x 353 x 93 mm
Product Packaging Weight	6,6 kg
Product Packaging Dimension	406 x 492 x 170 mm
Packing weight (1 in 1)	7,2 kg
Packing dimension (1 in 1)	418 x 182 x 507 mm
EAN EU	6943757614097

Add: Only works with 2.4 GHz Wi-Fi and does not support the 5 GHz-frequency band

Additional Features

- Max+ mode
- Area specific scheduled cleaning
- Multi-floor mapping
- High battery capacity

Standard Features

- Smart home compatible
- High efficiency filter
- Obstacle detection
- Stair safety technology
- Automatic charging
- Continuous cleaning
- OTA technology
- App control

Additional Accessory

- Accessory Kit
- Disposable cleaning cloths
- Auto Empty station Dust Bags
- Charging Dock

What's in the box

1	Robotic vacuum cleaner DEEBOT OZMO T8	20	Disposable cleaning cloths
1	Charging dock	2	High efficiency filter
4	Side brushes	1	User manual
1	OZMO Pro	1	Cleaning tool
