

u-JAYS Wireless

Wireless

Experience your music with wireless freedom through Bluetooth® and Qualcomm® aptX™ audio. Great sound made convenient.

Whether you're traveling, working out at the gym, or simply walking around town, u-JAYS Wireless makes everything more enjoyable. Going wireless means freeing yourself from the endless frustration of tangled cables or the constant plugging and unplugging between devices.

All day listening

With more than 25 hours of wireless playback there is no need to worry about running out of batteries. Just touch, play and go.

Sound isolation

The soft and adaptive ear cushions efficiently keep surrounding sounds out and your music for your ears only.

Touch control

Integrated touch control give you an easy-to-use experience with full control one touch away. Take calls, swipe through your favorite songs and much more at ease.

Touch lock

The touch lock secures the controls, allowing you to play around with your u-JAYS Wireless any way you want without unintentional interruption.
